

Discipline by Discipline: Project Management

As a project manager for many years I've leveraged a range of techniques and approaches that have helped me manage a wide range of green-field software development, COTS (Custom Off-the-Shelf), and Hardware implementations. Most of my [website](#) is focused on successfully enabling technology to support business value and *managing* how this happens is covered throughout. However, here are some brief perspectives that guide a lot of how I view and manage projects.
